Assessing the Need for *Pediatric Walking Assessment* in Saskatchewan: A Mixed Methods Needs Assessment

We are interested in your thoughts on pediatric walking assessment in Saskatchewan! This study will explore how we can support strategic planning for the development of pediatric walking assessment services across the province.

We are recruiting:

Families or support persons of children who live with a disability, injury, or diagnosis that causes a walking impairment, which may be permanent or temporary, or, individuals with lived experience of having difficulties walking as a child for at least 3 months.

What's involved:

If eligible, you will complete a 15 to 20 minute long online survey. Your responses will be anonymous.

This study has been approved by the University of Saskatchewan Behavioural Research Ethics Board (#6088)

Compensation:

You can be entered into a gift card draw!
